To the benefactors

Subject: Acknowledgments

Dear benefactors friends,

«Yes , water is life .»

You let your heart speak in response to our desire to acquire solar panels to overcome the lack of water all around us. Because of you, this project was made possible. The solar pump and the panels are installed to the delight of the entire community, the young people in training and those around us. In addition to the daily use of water, we can keep on gardening without having to worry about the water shortage during the dry season.

By writing these few words, we want to stress how delighted we are and reiterate our gratitude for your invaluable contribution.

May God, the master of all inspiration, reward you a hundredfold of your benefits! We carry you in our daily prayers!

At the same time, we wish you a Merry Christmas and a Happy New Year! May 2019 see all your most cherished aspirations come true!
